

Olayinka Ogunwemimo

Software Engineer · Full-Stack, React & AI Integration

Lagos, Nigeria · Remote

SUMMARY

Software engineer specialising in data-intensive web applications, AI integration, and performance optimization. Builds platforms that process hundreds of millions of data points in real time, adopted by global manufacturers. Combines pixel-perfect UI craft with full-stack depth — from React and TypeScript to Python, FastAPI, and RAG pipelines.

EXPERIENCE

Software Developer

2026

Codeminer high tech a.g.

- Diagnosed and resolved a 45-day Kubernetes (K3s) API pod failure blocking backend deployments, restoring the QR-code backend service and a user-facing internal server error.
- Recovered an undocumented production server via a time-boxed Hetzner KVM rescue, resetting SSH/root credentials and backing up front- and back-end code under deadline pressure.
- Reconstructed a local development environment for a RAG-based full-stack application no team member could run, resolving CORS and bot-protection blockers to enable testing.
- Migrated production code from a developer's personal GitHub into managed repositories, resolving commit-attribution issues during handover.

Senior Front-end Engineer

2022 – 2026

Lykdat

- Built a multi-modal fashion search interface (keyword, image, URL) spanning 50+ global brands, enabling enterprise clients to discover and compare products at scale.
- Engineered the RAG pipeline powering an AI assistant using Next.js API endpoints, grounding responses in real customer review data.
- Delivered tooling adopted by MAS Holdings — a major global apparel manufacturer — replacing 30+ field researchers and empowering designers and production teams with data-driven decisions.
- Built a cross-brand aggregate insights page processing and visualizing sentiment, attribute, and ratings data across 553.7K+ products, 74 brands, and 106.2M customer reviews.
- Optimized front-end performance on data-intensive analysis pages rendering sentiment charts, attribute breakdowns, and 800+ review summaries, significantly reducing load times.

Front-end Session Lead

2022

Udacity

- Led weekly sessions and webinars for 50–100 students on front-end development, achieving a 4.89/5 satisfaction rating by breaking complex topics into project-based learning experiences.
- Mentored students 1-on-1, providing personalised code reviews and career guidance; reviewed and graded projects against industry standards.

Front-end Developer

2017 – 2022

Vatebra Limited

- Built a custom Drupal theme for the West Africa Examinations Council Nigeria (waecnigeria.org) serving millions of students — live and operational 8 years post-deployment.
- Created custom WordPress themes from scratch for multiple enterprise sites (Genesys Health, Vatebra Tech Hub) still active years after initial development.
- Developed Razor view templates for .NET web applications, bridging back-end .NET logic with clean, maintainable front-end implementations.
- Translated UI/UX designs into pixel-perfect, interactive interfaces and conducted regular cross-browser code reviews across a shared enterprise codebase.

Designer

2013 – 2016

Obaika Racing

- Engineered a fully custom WordPress + WooCommerce theme powering an end-to-end merchandise storefront with product listings, cart, and seamless checkout.
- Designed car-wrap graphics, branded driver suits, and weekly promotional posters, maintaining brand identity and visual storytelling across all platforms.

EDUCATION

B.Sc. Computer Science

Federal University of Agriculture Abeokuta

2008 – 2012

CERTIFICATIONS

- AI Engineer Production Track: Deploy LLMs & Agents at Scale — Udemy (2026)
- AI Engineer Agentic Track: The Complete Agent & MCP Course — Udemy (2026)
- AI Engineer Core Track: LLM Engineering, RAG, QLoRA, Agents — Udemy (2026)
- Mentorship Nanodegree — Udacity (2022)
- React Nanodegree — Udacity, Inc. (2018)

SKILLS

Languages: Python, JavaScript, TypeScript, PHP, SQL, HTML5, CSS, XML, GraphQL, Ruby, Swift

Frameworks & Libraries: React, React Native, Next.js, Redux, Node.js, Django, FastAPI, Laravel, Razor Pages, Tailwind CSS, Recharts, jQuery

AI / Data: RAG pipelines, LangGraph, AutoGen, OpenAI API, Hugging Face Transformers, Model Context Protocol (MCP), Pandas, Beautiful Soup, Claude API

Platforms & Tools: AWS (EC2, Lambda), Docker, Kubernetes (K3s), Vercel, WordPress, WooCommerce, Firebase, Git/GitHub, Figma, Stripe, Twilio

Specialties: Data-intensive web apps, performance optimization, API architecture, web scraping, responsive design, SEO, UI/UX implementation
